Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

# 1.1 Identification of the Substance / Preparation and the Company / Undertaking Product Name: LITHIUM TETRABORATE

Product Code: 11401194 Chemical name/synonyms: Lithium Tetraborate Trade Names: Chemical Family: Alkali Tetraborates Molecular Formula: Li2B4O7 EC No.: 234-514-3 Cas No : 12007-60-2

## 1.2.1 Relevant identified uses of the substance

The product is used in Xray fluorescence sample preparation.

## 1.2.2 Uses advised against

None

#### **1.3.** Details of the supplier of the safety data sheet

Supplier: Klen International (74) Pty Ltd; 36 Hemisphere Street Neerabup WA 6031 Email: <u>info@klen.com.au</u> ABN: 25 008 776 681 Fax: (+618) 9306 8922 Tel: (+618) 9306 8900 Contact Point - Chemist - Tel (+618) 9306 8900 EMERGENCY TELEPHONE: A/H (+61) 417 188 935

# 2. Hazards Identification

2.1. GHS Classification

Skin Corrosion/irritation (Category 2) Serious eye damage/eye irritation (Category 2) Specific target organ toxicity – single exposure (Category 3), Respiratory system

# 2.2 GHS Label elements, including precautionary statements

**Pictogram :** 

Signal word: Warning

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

### Hazard statement(s)

H315	Causes skin irritation
H319	Causes serious eye irritation
H335	May cause respiratory irritation

# **Precautionary statements:**

Prevention	
P261	Avoid breathing dust/fume/mist/vapours/spray.
P264	Wash skin thoroughly after handling.
P271	Use only outdoors or in a well ventilated area.
P280	Wear eye protection/ face protection.
P280	Wear protective gloves.
Response	
P304 +P340 +P312	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call POISON CENTER or doctor/physician if you feel unwell.
P332 + P313	If skin irritation occurs: Get medical advice / attention.
P337 + P313	If eye irritation persists: Get medical advice / attention.
Storage	
P403 + P233	Store in a well ventilated place. Keep container tightly closed.
Disposal	
P501	Dispose of contents /container to an approved waste disposal plant.

### 2.3. Other hazards - none

# 3. Composition / Information on Ingredients

CAS#	Chemical Name	%
12007-60-2	Lithium Tetraborate	>99

EC Index No: Lithium tetraborate 234-514-3

Classification : Skin Irrit. 2; Eye Irrit.2; STOT SE 3; H315, H319, H335. C <= 100%

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

## 4. FIRST AID MEASURES

#### 4.1 Description of First Aid Measures

#### **General Advice**

Consult a physician. Show this safety data sheet to the doctor in attendance.

#### If Inhaled

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

#### In case of skin contact

Wash off with soap and plenty of water. Consult a physician.

#### In case of eye contact

Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

#### If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

#### 4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11.

**4.3 Indication of any immediate medical attention and special treatment needed** No data available

# **5.** Fire-fighting measures

### 5.1. Extinguishing media

Use water spray, alcohol resistant foam, dry chemical or carbon dioxide.

### 5.2. Special hazards arising from the substance

Borane/boron oxides, Lithium oxides.

#### **5.3.** Advice for firefighters:

Wear self-contained breathing apparatus for firefighting if necessary.

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

# 6. ACCIDENTAL RELEASE MEASURES

#### 6.1. Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Avoid dust formation. In case of exposure to high level of airborne dust, wear a personal respirator in compliance with national legislation.

#### 6.2. Environmental precautions

Do not let lithium tetraborate enter drains.

# 6.3. Methods and material for containment and cleaning up

# Land spill

Vacuum, shovel or sweep up lithium tetraborate and place in containers for disposal in accordance with applicable local regulations. Avoid contamination of water bodies during clean up and disposal.

#### Spillage into water

Where possible, remove any intact containers from the water. Advise local water authority that none of the affected water should be used for irrigation or for the abstraction of potable water until natural dilution returns the boron value to its normal environmental background level (see sections 12, 13 and 15).

# 6.4. Reference to other sections

See Sections 8 and 13 for further information

#### 7. Handling and Storage

#### 7.1. Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Provide appropriate exhaust ventilation at places where dust is formed. For precautions see section 2.2.

# 7.2. Conditions for safe storage, including any incompatibilities

Store in a cool place. Keep container tightly closed in a dry and well-ventilated place. Moisture sensitive.

Storage class (TRGS 510) : Non Combustible Solids

# 7.3. Specific end use(s)

Apart from the uses mentioned in section 1.3 no other specific.

8. Exposure controls / Personal protection

#### **8.1.** Control parameters

Occupational Exposure Limit Values None assigned DNEL values: No data PNEC values: No data

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

#### **8.2. Exposure controls**

### **Appropriate engineering controls**

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at end of workday.

## **Eye/Face Protection**

Safety glasses with eye shields conforming to EN166. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN166(EU).

#### **Skin Protection**

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching gloves outer surface) to avoid skin contact. Dispose of used gloves in accordance with applicable laws and good laboratory practices.

The selected gloves must satisfy specifications of EU Directive 89/686/EEC and the standard EN374 derived from it.

#### **Body Protection**

Impervious clothing. The type of equipment must be selected according to the concentration and amount of the substance being used at the workplace.

#### **Respiratory protection**

For nuisance exposures use type p95 (US) or type P1 (EU EN 143) particle respirator. For higher level protection use type OV/AG/P99 (US) or type ABEK-P2 (EU EN 143) respirator cartridges. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

#### 9. PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties
Odour: Odourless
Appearance: White crystalline powder
pH: a 1% suspension has a pH of 8.9
Percent Volatile: Not applicable
Vapour Pressure: Not applicable
Vapour Density: Not applicable
Boiling Point: Not applicable

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

Melting Point: 915-919°C Solubility In Water: 2.7 % by wt. @ 20°C Evaporation Rate (Butyl Acetate = 1): Not applicable Specific Gravity: 2.4 g/cc Molecular Weight: 169.14 Coeff. Oil/Water: Not applicable Odour Threshold: Not applicable Flammable Limits: Upper: Not available Lower: Not available. Flash Point: Not applicable Autoignition Temperature: Not applicable Explosive Properties: Not explosive Oxidizing Properties: Not an oxidizer

# **10. STABILITY AND REACTIVITY**

10.1. Reactivity
No data available..
10.2. Chemical stability
Stable under recommended storage conditions..
10.3. Possibility of hazardous reactions
No data available.
10.4. Conditions to avoid: Avoid moisture.
10.5. Incompatible materials
Reaction with strong reducing agents such as metal hydrides, acetic anhydride or alkali metals
will generate hydrogen gas which could create an explosive hazard.
10.6. Hazardous decomposition products

Lithium oxide and boron oxides

# **11. TOXICOLOGICAL INFORMATION**

### 11.1. Information on toxicological effect

11.1.1. Substances

### Lithium Compounds:

The toxicity of lithium compounds is a function of their solubility in water. Lithium ion has central nervous system toxicity. The initial effects of lithium exposure are tremors of the hands, nausea, micturition, slurred speech, sluggishness, sleepiness, vertigo, thirst and increased urine volume. Effects from continued exposure are apathy, anorexia, fatigue, lethargy, muscular weakness, and changes in ECG. Long-term exposure leads to hypothyroidism, leukocytosis, edema, weight gain, polydipsia/polyuria (increased water intake leading to increased urinary output), memory impairment, seizures, kidney damage, shock, hypotension, cardiac arrhythmias, coma, death. (Sax, Dangerous Properties of Industrial Materials, eighth edition).

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

#### Lithium Tetraborate:

Acute toxicity: Low acute oral toxicity; LD50 in rats is 2,400 to 2,600 mg/kg of body weight. Skin corrosion / irritation:

Low acute dermal toxicity; For sodium borates, LD50 in rabbits is greater than 2,000 mg/kg of body weight. Lithium tetraborate is poorly absorbed through intact skin Non-irritant. **Serious eye damage/ irritation:** Lithium tetraborate is a serious eye irritant.

**Respiratory or skin sensitisation:** N.A.

Germ cell mutagenicity: N.A.

Carcinogenicity N.A.

**Reproductive toxicity:** Animal feeding studies in rat, mouse and dog, at high doses of sodium borates, have demonstrated effects on fertility and testes . Studies with the chemically related boric acid in rat, mouse and rabbit, at high doses, demonstrate developmental effects on the foetus including foetal weight loss and minor skeletal variations. The doses administered were many times in excess of those which humans would normally be exposed to. Human epidemiological studies show no increase in pulmonary disease in occupational populations with chronic exposures to boric acid dust and sodium borate dust. A recent epidemiology study under the conditions of normal occupational exposure to borate dusts indicated no effect on fertility.

# STOT-single exposure: N.A.

STOT-repeated exposure: N.A.

**Aspiration hazard:** Low acute inhalation toxicity; For sodium borates, LC50 in rats is greater than 2.0 mg/l (or g/m3).

**Special note**: By analogy with sodium salts of boric acid, it is possible that this product could be considered toxic by ingestion, an eye and respiratory irritant; and a reproductive and developmental toxin.

#### **12. ECOLOGICAL INFORMATION**

**12.1. Toxicity** – no specific data for lithium borates. The following is for sodium borates **Phytotoxicity:** Boron is an essential micronutrient for healthy growth of plants, however, it can be harmful to boron sensitive plants in higher quantities. Care should be taken to minimise the amount of borate product released to the environment.

**Algal toxicity:** Green algae, *Pseudokirchneriella subcapitata* (Hansveit and Oldersma, 2000) 72hr EC50 –biomass = 40 mg B/L, or 229 mg boric acid/L.

**Invertebrate toxicity:** Daphnia, Daphnids, *Daphnia magna* (Gersich, 1984a) 48-hr LC50 = 133 mg B/L or 760 mg boric acid/L or 619 mg disodium tetraborate , anhydrous/L

**Fish toxicity:** Fish, Fathered minnow, *Pimephales promelas* (Soucek et al., 2010) 96-hr LC50 = 79.7 mg B/L or 456 mg boric acid/L or 370 mg disodium tetraborate, anhydrous

**12.2. Persistence and degradability:** Boron is naturally occurring and ubiquitous in the environment. Boron occurs naturally in sea water at an average concentration of 5 mg B/l and fresh water at 1 mg B/l or less. In dilute aqueous solutions the predominant boron species present is undissociated boric acid

**12.3. Bioaccumulative potential:** N.A.

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

**12.4.** Mobility in soil: The product is soluble in water and is leachable through normal soil.

12.5. Results of PBT vPvB assessment: N.A.

12.6. Other adverse effects: N.A.

## **13. DISPOSAL CONSIDERATIONS**

**13.1. Waste treatment methods:** Offer surplus and non-recyclable solutions to a licensed disposal company. Dissolve or mix the material with a combustible solvent and burn it in a n incinerator with an afterburner and scrubber.

# **14. TRANSPORT INFORMATION**

Lithium borate has no UN Number, and is not regulated under international rail, road, water or air transport regulations.

- 14.1. UN number: N.A.
- **14.2. UN proper shipping name:** N.A.

14.3. Transport of hazard classes: N.A.

- 14.4. Packing group: N.A.
- 14.5. Environmental hazards: N.A.
- **14.6. Special precautions for user:** N.A.

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: (N.A.)

# **15. REGULATORY INFORMATION**

### 15.1. Safety, health and environmental regulations/legislation specific for the substance

It should be noted that borates are safe under conditions of normal handling and use, besides, they are essential nutrients to plants, and research shows that they play a beneficial role in human health. CLP classification has been solely based on animal tests where animals were exposed to high doses of boric acid over long periods of time. These doses were many times higher than humans are exposed to under conditions of normal handling and use. Consequently, a precautionary decision was taken by the European Commission.

# **Clean Air Act (Montreal Protocol)**

Lithium tetraborate was not manufactured with and does not contain any Class I or Class II ozone depleting substances.

# **Chemical inventory listing**

- AICS listed
- U.S. EPA TSCA Inventory listed
- Canadian DSL -no
- EINECS -listed

Ensure all national/local regulations are observed.

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc

# **16. OTHER INFORMATION**

A number of lithium salts (sulphate, citrate, carbonate and oratate) are used in treatment of bipolar disorder as a mood stabiliser. No information is available on lithium borates

#### 16.2. List of abbreviation and acronyms used in this MSDS

CAS N°: Chemical Abstracts Service number EC N° : EINECS Number : European Inventory of Existing Commercial Substances **DSD:** Dangerous Substances Directive 67/548/EEC CLP: Classification Labelling Packaging Regulation: Regulation (EC) N°1272/2008 1st ATP: 1st Adaptation to Technical and scientific Progress LD50: Median Lethal Dose LC50: Lethal Concentration. 50% N.A. Not Applicable **DNEL:** Derived No effect Level PNEC: Predicted No Effect Concentration **OSHA:** Occupational Safety & Health Administration Cal OSHA: The State of California Division of Occupational Safety and Health (DOSH) **PEL:** Permissible Exposure Limits ACGIH: American Conference of Governmental Industrial Hygienists TLV: Threshold Limit Value Japanese MITI: Japanese Ministry of International Trade and Industry EC50: Half maximal effective concentration **PBT:** Persistent, Bioaccumulative and Toxic substance vPvB: Very Persistent and Very Bioaccumulative U.S. EPA TSCA Inventory: Inventory of the chemical substances manufactured or processed in the United States according to Toxic Substances Control Act compiled and

published under the authority of the Environmental Protection Agency

### **16.3. Exposure Scenario**

An exposure Scenario for borates is available separately.

Canadian DSL: Canadian Domestic Substances List

Date of Issue: 6/06/2018 Issue No 2 Last revision: June 2018 File F:\MSDS\msdsother\msds original vmr\LithiumTetraborate.doc
